

PRESTON RAKOVSKY

(347) 405 -1386 | www.prestonr.xyz | rakovsky.p@northeastern.edu

EDUCATION

Northeastern University, Boston, MA

Sept 2018 – Present

Khoury College of Computer Sciences

Bachelor of Science in Computer Science & Business Administration (Finance)

Expected Apr 2023

Relevant Courses: Algorithms and Data Structures, Database Management Systems, Data Science I, Computer Systems

GPA: 3.6/4.0 | Dean's List

COMPUTER KNOWLEDGE

Languages: Python, Go, SQL, Java, JavaScript, ReactJS, PHP, HTML/CSS

Tools/Libraries: RESTful API, gRPC, Protocol Buffers, Git, Postman, Pandas, Spark, GCP Cloud Functions

EXPERIENCE

- May – Dec 2021 **Datadog, Software Engineer Intern** New York, NY
- Migrated out new gRPC service to resolve key-value requests using Go and Protocol Buffers
 - Decreased p99 latency of gRPC endpoint by 31% by utilizing worker pool to make writes to database async
 - Built Cuckoo Filter data structure from original white paper in Go to achieve quick lookup performance
 - Leveraged knowledge in backend development, Go, gRPC, Protobuf, Redis & Postgres
- Aug – Dec 2020 **Poloniex, Software Engineer Intern** Boston, MA
- Decreased CPU utilization by 28% by refactoring PHP code to utilize in-memory cache to store SQL result-set
 - Integrated pre-existing software to communicate with new micro-services based in Docker
 - Rigorously tested web socket functions for code coverage with unit tests in Go
 - Leveraged knowledge in backend development, Go, Docker, database systems (PostgreSQL) & Git
- Jun – Aug 2020 **Dell Technologies, Software Engineer Intern** Hopkinton, MA
- Utilized REST APIs and *Python* to integrate vulnerability management system with internal ticketing system, increasing FY 2021 internal ticket volume by 843%
 - Built Python-based ETL data pipeline to extract data on batch-basis, utilizing Pandas and Numpy
- Apr – Aug 2020 **Facebook, Data Challenge Finalist** New York, NY
- Engaged in SQL workshops and mock interviews with Facebook Data Engineers and Data Scientists
 - Selected as 1 of 80 from a pool of 600 eligible applicants for this 4 month program
- May – Aug 2019 **ING Financials LLC, IT Development Solutions Intern** New York, NY
- Spearheaded development of interactive internal SQL Mapping tool in Java
 - Leveraged knowledge in SQL & Java

PROJECTS

- Chicken Tinder**, Personal Project (React Native, Google Cloud Platform, Python) Aug 2020
- Card swiping React Native app that employed a Python script on GCP's Cloud Functions that called a Yelp's *REST API* to generate 50 nearest restaurants to your given location and rendered them in a card-deck format
 - Raised \$5,000 in funding through grant from Jelly Incubation Fund
- Analytics Pipeline and Dashboard**, Personal Project (Spark, EC2, S3, EMR, SQL, Tableau, Python) Oct 2020
- Automated ETL Spark pipeline for transforming and querying Google Analytics data into Tableau Dashboard

ACTIVITIES

- Sep – Nov 2020 **Facebook, Above and Beyond Computer Science Participant** Boston, MA
- Attended weekly development workshops geared towards enhancing programming fundamentals
- Sep – Nov 2019 **NU SPLASH, Introduction Computer Science Co-Teacher** Boston, MA
- Developed and co-led very basic fundamentals of computer science curriculum for high school students
- Oct – Dec 2018 **Sustainable Business Network, Business Interviewer** Boston, MA
- Conducted interviews with CEOs of businesses in the Greater Boston Area about their business practices
